

REFLEX HP

REFLEX HP | FITNESS CENTRE AND CHANGING ROOM FLOORING

PRODUCT DESCRIPTION

Mondo Reflex HP is a highly versatile, double-layered rubber flooring with a hammered surface finish.

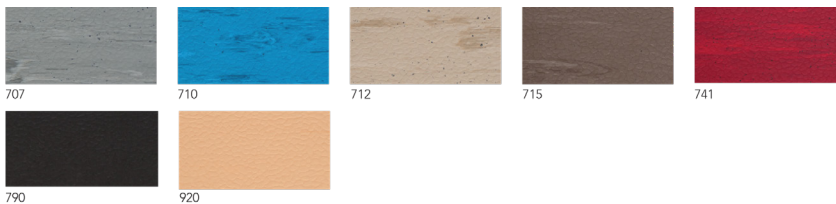

Engineered for multi-sport fitness clubs (weight rooms excluded), locker/changing rooms and high traffic areas.

Reflex HP is available in 4mm roll form consisting of a 2mm wear layer vulcanised onto a load bearing base.

COLOURS

Reflex HP is available in a range of seven fashionable and functional colours that will blend into most environments. Some shades have a tone on tone marble and a new hammered effect to create texture.

SPECIFICATIONS

NZBC Protection from fire - Compliant

IDEAL APPLICATIONS

- Fitness and cardio rooms
- Indoor multi-sport halls and training areas
- Locker and changing rooms
- High traffic areas.

KEY PRODUCT BENEFITS

Extremely versatile

Reflex HP is a flooring solution for various spaces within fitness centres.

- Movement
- Strength/cardio
- Mobility/stability
- Fitness classes
- Locker/changing rooms

Easy to clean and maintain

The solid rubber upper layer is easy to clean, with no special waxes or coatings required.

Hygienic and odour-free

The non-porous surface is water resistant, so bacteria in perspiration never gets a foothold. This means there's no risk of hard-to-eliminate odours.

Environmentally friendly

Reflex HP is a mix of synthetic, natural and factory-recycled rubber. It complies with VOC emission guidelines. At the end of its lifespan, it can be disposed of as urban solid waste.

Lasting good looks

Reflex HP provides a seamless and long lasting appearance. No welding, combined with the material's natural elasticity means joints won't split if the floor settles or expands.

Environmentally sound

Greenguard certified
