

CASE STUDY

MUSIKENE SCHOOL OF MUSIC SPAIN

ARCHITECT REQUIREMENTS

Of course an acoustical requirement was the forefront of any specified floor covering on this Project. The material also had to be extremely durable, easy to maintain and fit in with the overall environment.

SOLUTION

Over 8,000m² of Kayar was installed throughout this project not only because it ticked all boxes but the presence of natural coconut fibres gives the material a natural element to it.

DESCRIPTION OF FLOORING SYSTEM

Kayar
