

# SPORT IMPACT

## SPORT IMPACT | PREMIUM WEIGHT AND SKATE RESISTANT FLOORING

### PRODUCT DESCRIPTION

Mondo Sport Impact is a virtually indestructible, smooth and non-slip rubber floor with a load-bearing base, in 6mm and 10mm thickness. Available in both roll and tile format, Sport Impact is ideal for indoor walkways, change rooms, gyms with heavy equipment, fitness and cardio areas as well as weight rooms and indoor athletic stadiums.

### COLOURS

Sport Impact is available in a range of twelve fashionable and functional colours that will blend into most environments.

### SPECIFICATIONS

NZBC Protection from fire - Compliant

### IDEAL APPLICATIONS

- Gyms with heavy equipment
- Indoor athletic stadiums
- Fitness cardio areas
- Weight rooms
- Ice rinks.

### KEY PRODUCT BENEFITS

#### Strength and durability

Sport Impact is a vulcanised rubber material with a load-bearing base. It is the strongest indoor sport flooring on the market, it is dent and tear resistant, withstanding the impact from heavy gym equipment, skates and spikes.

#### Easy to clean and maintain

The smooth, solid rubber upper layer is easy to clean, with no special waxes or coatings required.

#### Hygienic and odour-free

The non-porous surface is water resistant, so bacteria in perspiration never gets a foothold. This means there's no risk of hard-to-eliminate odours.

#### Environmentally friendly

Sport Impact is a mix of synthetic, natural and factory-recycled rubber. It complies with VOC emission guidelines. At the end of its lifespan, it can be disposed of as urban solid waste.

#### Lasting good looks

Sport Impact provides a seamless and long lasting appearance. No welding, combined with the material's elasticity means joints won't split if the floor settles or expands.

#### Environmentally Sound

Greenguard certified
